Analytica Chimica Acta 311 (1995) 443–446

ANALYTICA CHIMICA ACTA

Author Index

Abad, A.
— and Montoya, A.
Application of a monoclonal antibody-based ELISA to the determination of carbaryl in apple and grape juices 365
Aboul-Enein, H.Y., see Bunaciu, A.A. 193
Abuknesha, R., see Mouvet, C. 331
Agüera, A., see Fernandez-Alba, A.R. 371
Ahlgrén, M., see Turunen, M. 85
Alder, J.F., see Rezgui, N.D. 99
Allen, J., see Rezgui, N.D. 99
Anstice, P.J., see Przybylko, A.R.M. 77

Baker, J.G., see Rezgui, N.D. 99
Balinova, A.
Extension of the bioautograph technique for multiresidue determination of fungicide residues in plants and water 423
Barceló, D., see Gascón, J. 357
Barceló, D., see Marco, M.-P. 319
Barceló, D., see Marty, J.L. 265
Barceló, D., see Puig, D. 63
Beckles, D., see Boguslavsky, L. 15
Besombes, J.-L.
—, Cosnier, S., Labbé, P. and Reverdy, G.
A biosensor as warning device for the detection of cyanide, chlorophenols, atrazine and carbamate pesticides 255
Boguslavsky, L.
—, Kalash, H., Xu, Z., Beckles, D., Geng, L., Skotheim, T., Laurinavicius, V. and Lee, H.S.
Thin film bienzyme amperometric biosensors based on polymeric redox mediators with electrostatic bipolar protecting layer 15
Boutron, C.F., see Chisholm, W. 141
Brecht, A.
—, Piehler, J., Lang, G. and Gauglitz, G.
A direct optical immunosensor for atrazine detection 289
Brokenshire, J., see Przybylko, A.R.M. 77
Brossier, P., see Le Gal La Salle, A. 301
Broussard, S., see Mouvet, C. 331
Bunaciu, A.A.
—, Grasu, A. and Aboul-Enein, H.Y.
Pharmaceutical applications of a flurbiprofen sensor 193
Burns, D.T.
—, Chimpalee, N. and Harriott, M.
Applications of a slotted tube atom trap and flame atomic absorption spectrometry: determination of bismuth in copper-based alloys with and without hydride generation 93

Candelone, J.P., see Chisholm, W. 141
Casella, I.G.
— and Marchese, R.
Sulfite oxidation at a platinum glassy carbon electrode. Determination of sulfite by ion exclusion chromatography with amperometric detection 199
Casella, I.G.
Platinum/glassy carbon electrode as detector for liquid chromatographic determination of hydroxyl-containing compounds 37
Cerdà, A.
—, Oms, M.T., Forteza, R. and Cerdà, V.
Evaluation of flow injection methods for ammonium determination in wastewater samples 165
Cerdà, V., see Cerdà, A. 165
Chandravanshi, B.S., see Megersa, N. 183
Chen, L., see Pichon, V. 429
Chen, S.W., see Juo, C.G. 153
Chimpalee, N., see Burns, D.T. 93
Chiron, S., see Marco, M.-P. 319
Chisholm, W.
—, Rosman, K.J.R., Boutron, C.F., Candelone, J.P. and Hong, S.
Determination of lead isotopic ratios in Greenland and Antarctic snow and ice at picogram per gram concentraticns 141
Coche-Guerente, L.
—, Cosnier, S., Innocent, C. and Mailley, P.
Development of amperometric biosensors based on the immobilization of enzymes in polymer films electrogenerated from a series of amphiphilic pyrrole derivatives 23
Contreras, M., see Fernandez-Alba, A.R. 371
Cosnier, S., see Besombes, J.-L. 255
Cosnier, S., see Coche-Guerente, L. 23
Cremisini, C.
—, Di Sario, S., Mela, J., Pilloton, R. and Palleschi, G.
Evaluation of the use of free and immobilised acetylcholinesterase for paraoxon detection with an amperometric choline oxidase based biosensor 273
Cumming, R.
—, Farrell, C., Nitescu, I., Rowell, F.J. and Tang, L.X.
Environmental analysis in the workplace; development of airborne monitoring systems for potentially harmful pharmaceuticals: an improved rapid ELISA for ceftazidime 377

Dankwardt, A., see Hock, B. 393
Degrand, C., see Le Gal La Salle, A. 301
Depledge, M.H., see Lundebye, A.-K. 109
Ding, H., see Huang, J. 115
Di Sario, S., see Cremisini, C. 273
Dodson, W.S., see Huang, J. 115
Durst, R.A., see Siebert, S.T.A. 309

Ebdon, L.
—, Foulkes, M. and O'Hanlon, K.
Optimised simultaneous multi-element analysis of environmental slurry samples by inductively coupled plasma atomic emission spectrometry using a segmented array charge-coupled device detector 123
Emnéus, J., see Ruzgas, T. 245
Eremin, S.A., see Fránek, M. 349

Farrell, C., see Cumming, R. 377
Fernandez-Alba, A.R.
—, Valverde, A., Agüera, A., Contreras, M. and Rodriguez, D.
Determination of Procymidone in vegetables by a commercial competitive inhibition enzyme immunoassay 371
Fernández-Romero, J.M., see Luque de Castro, M.D. 281
Fielden, P.R., see Przybylko, A.R.M. 77
Forteza, R., see Cerdà, A. 165
Foulkes, M., see Ebdon, L. 123
Fránek, M.
—, Kolář, V. and Eremin, S.A.
Enzyme immunoassays for *s*-triazine herbicides and their application in environmental and food analysis 349
Fránek, M., see Šišák, M. 415
Furusawa, M., see Kiba, N. 71

Gascón, J.
—, Martinez, E. and Barceló, D.
Determination of atrazine and alachlor in natural waters by a rapid-magnetic particle-based ELISA Influence of common cross-reactants: deethylatrazine, deisopropylatrazine, simazine and metolachlor 357
Gascón, J., see Marco, M.-P. 319
Gauglitz, G., see Brecht, A. 289
Geng, L., see Boguslavsky, L. 15
Glazier, S.A., see McCurley, M.F. 211
Gooijer, C., see Nuijens, M.J. 47
Gorton, L., see Ruzgas, T. 245
Grasu, A., see Bunaciu, A.A. 193

Hammock, B.D., see Marco, M.-P. 319
Harriott, M., see Burns, D.T. 93
Haug, C., see Sures, B. 135
Helie-Fourel, I., see Le Botlan, D. 217
Hennion, M.-C., see Pichon, V. 429
Her, G.R., see Juo, C.G. 153
Hock, B.
—, Dankwardt, A., Kramer, K. and Marx, A.
Immunochemical techniques: antibody production for pesticide analysis. A review 393
Hofstraat, J.W., see Nuijens, M.J. 47
Hong, S., see Chisholm, W. 141
Hörchner, U.
— and Kalivas, J.H.
Further investigation on a comparative study of simulated annealing and genetic algorithm for wavelength selection 1
Hruška, K., see Šišák, M. 415
Huang, J.
—, Ding, H., Dodson, W.S. and Li, Y.
Application of TiO_2 sol for UV radiation measurements 115
Hunter, D., see Lundebye, A.-K. 109

Ilcheva, L., see Rizov, I. 175
Innocent, C., see Coche-Guerente, L. 23
Irons, F., see Przybylko, A.R.M. 77
Ismail, G., see Mouvet, C. 331

Jeannot, R., see Mouvet, C. 331
Juo, C.G.
—, Chen, S.W. and Her, G.R.
Mass spectrometric analysis of additives in polymer extracts by desorption chemical ionization and collisional induced dissociation with B/E linked scanning 153

Kalash, H., see Boguslavsky, L. 15
Kalivas, J.H., see Hörchner, U. 1
Kato, A., see Kiba, N. 71
Kiba, N.
—, Kato, A. and Furusawa, M.
Determination of branched-chain L-amino acids by flow-injection analysis with co-immobilized leucine dehydrogenase/NADH oxidase and chemiluminescence detection 71
Knopp, D.
Application of immunological methods for the determination of environmental pollutants in human biomonitoring. A review 383
Kolář, V., see Fránek, M. 349
Kramer, K., see Hock, B. 393
Kristiansen, K., see Lundebye, A.-K. 109
Krogsdam Christensen, A.M., see Lundebye, A.-K. 109

Labbé, P., see Besombes, J.-L. 255
Lacorte, S., see Marty, J.L. 265
Lang, G., see Brecht, A. 289
Laurinavicius, V., see Boguslavsky, L. 15
Le Botlan, D.
— and Helie-Fourel, I.
Assessment of the intermediate phase in milk fat by low-resolution nuclear magnetic resonance 217
Lee, H.S., see Boguslavsky, L. 15
Le Gal La Salle, A.
—, Limoges, B., Rapicault, S., Degrand, C. and Brossier, P.
New immunoassay techniques using Nafion-modified electrodes and cationic redox labels or enzyme labels 301
Li, Y., see Huang, J. 115
Limoges, B., see Le Gal La Salle, A. 301
Lukaszewski, Z., see Szymanski, A. 31

Lundebye, A.-K.
—, Vedel, G.R., Krogsdam Christensen, A.M., Kristiansen, K., Hunter, D. and Depledge, M.H.
Improved quantification of stress proteins by western blotting 109
Luque de Castro, M.D.
— and Fernández-Romero, J.M.
Development of an optical flow-through biosensor for the determination of sulphite in environmental samples 281

Maciag, C., see Mouvet, C. 331
Mailley, P., see Coche-Guerente, L. 23
Manclús, J.J.
— and Montoya, A.
Development of immunoassays for the analysis of chlorpyrifos and its major metabolite 3,5,6-trichloro-2-pyridinol in the aquatic environment 341
Mank, A.J.G., see Nuijens, M.J. 47
Marchese, R., see Casella, I.G. 199
Marco, M.-P.
—, Chiron, S., Gascón, J., Hammock, B.D. and Barceló, D.
Validation of two immunoassay methods for environmental monitoring of carbaryl and 1-naphthol in ground water samples 319
Marko-Varga, G., see Ruzgas, T. 245
Martinez, E., see Gascón, J. 357
Marty, J.-L., see Rouillon, R. 437
Marty, J.L.
—, Mionetto, N., Lacorte, S. and Barceló, D.
Validation of an enzymatic biosensor with various liquid chromatographic techniques for determining organophosphorus pesticides and carbaryl in freeze-dried waters 265
Marx, A., see Hock, B. 393
McCurley, M.F.
— and Glazier, S.A.
Optical control of enzymatic conversion of sucrose to glucose by bacteriorhodopsin incorporated into self-assembled phosphatidylcholine vesicles 211
Megersa, N.
—, Chandravanshi, B.S. and Moges, G.
Potentiometric determination of tanatalum with a hexafluorotantalate(V)-selective liquid membrane electrode 183
Mela, J., see Cremisini, C. 273
Mestres, J.-J., see Rouillon, R. 437
Meulenberg, E.P.
— and Stoks, P.G.
Water quality control in the production of drinking water from river water. The application of immunological techniques for the detection of chlorophenoxy acid herbicides (2,4-D) 407
Mionetto, N., see Marty, J.L. 265
Miwa, T., see Takeuchi, T. 231
Mizuyuki, T., see Nagaosa, Y. 225
Moges, G., see Megersa, N. 183
Montoya, A., see Abad, A. 365
Montoya, A., see Manclús, J.J. 341
Mouvet, C.
—, Broussard, S., Jeannot, R., Maciag, C., Abuknesha, R. and Ismail, G.
Validation of commercially available ELISA microtiter plates for triazines in water samples 331

Nagaosa, Y.
— and Mizuyuki, T.
Determination of Cu(II) and Ni(II) as chelates with butyl xanthate by liquid chromatography with electrochemical and spectrophotometric detection 225
Nitescu, I., see Cumming, R. 377
Nuijens, M.J.
—, Zomer, M., Mank, A.J.G., Gooijer, C., Velthorst, N.H. and Hofstraat, J.W.
A cyanine fluorophore with a hydrazide functionality as labelling reagent for aldehydes in liquid chromatography 47

O'Hanlon, K., see Ebdon, L. 123
Oms, M.T., see Cerdà, A. 165

Palleschi, G., see Cremisini, C. 273
Peräniemi, S., see Turunen, M. 85
Pichon, V.
—, Chen, L. and Hennion, M.-C.
On-line preconcentration and liquid chromatographic analysis of phenylurea pesticides in environmental water using a silica-based immunosorbent 429
Piehler, J., see Brecht, A. 289
Pilloton, R., see Cremisini, C. 273
Przybylko, A.R.M.
—, Thomas, C.L.P., Anstice, P.J., Fielden, P.R., Brokenshire, J. and Irons, F.
The determination of aqueous ammonia by ion mobility spectrometry 77
Puig, D.
— and Barceló, D.
Comparative study of on-line solid phase extraction followed by UV and electrochemical detection in liquid chromatography for the determination of priority phenols in river water samples 63

Rapicault, S., see Le Gal La Salle, A. 301
Reeves, S.G., see Siebert, S.T.A. 309
Reverdy, G., see Besombes, J.-L. 255
Rezgui, N.D.
—, Allen, J., Baker, J.G. and Alder, J.F.
Quantitative millimetre wave spectrometry. Part I: design and implementation of a tracked millimetre wave confocal Fabry-Perot cavity spectrometer for gas analysis 99
Rizov, I.
— and Ilcheva, L.
Differential flow injection potentiometry 175
Roberts, M.A., see Siebert, S.T.A. 309
Rodriguez, D., see Fernandez-Alba, A.R. 371
Rosman, K.J.R., see Chisholm, W. 141

Rouillon, R.
—, Mestres, J.-J. and Marty, J.-L.
Entrapment of chloroplasts and thylakoids in polyvinylalcohol-SbQ. Optimization of membrane preparation and storage conditions 437
Rowell, F.J., see Cumming, R. 377
Ruzgas, T.
—, Emnéus, J., Gorton, L. and Marko-Varga, G.
The development of a peroxidase biosensor for monitoring phenol and related aromatic compounds 245

Siebert, S.T.A.
—, Reeves, S.G., Roberts, M.A. and Durst, R.A.
Improved liposome immunomigration strip assay for alachlor determination 309
Šišák, M.
—, Fránek, M. and Hruška, K.
Application of radioimmunoassay in the screening of polychlorinated biphenyls in cow's milk 415
Skotheim, T., see Boguslavsky, L. 15
Stoks, P.G., see Meulenberg, E.P. 407
Sures, B.
—, Taraschewski, H. and Haug, C.
Determination of trace metals (Cd, Pb) in fish by electrothermal atomic absorption spectrometry after microwave digestion 135
Sweeley, C.C., see Wiesner, D.A. 57
Swit, Z., see Szymanski, A. 31
Szymanski, A.
—, Swit, Z. and Lukaszewski, Z.
Studies of preservation of water samples for the determination of non-ionic surfactants 31

Takeuchi, T.
— and Miwa, T.
Signal enhancement of dansyl amino acids by fluorimetric detection with a packed flow cell in microcolumn liquid chromatography 231
Tang, L.X., see Cumming, R. 377
Taraschewski, H., see Sures, B. 135
Thomas, C.L.P., see Przybylko, A.R.M. 77
Turunen, M.
—, Peräniemi, S., Ahlgrén, M. and Westerholm, H.
Determination of trace elements in heavy oil samples by graphite furnace and cold vapour atomic absorption spectrometry after acid digestion 85

Valverde, A., see Fernandez-Alba, A.R. 371
Vedel, G.R., see Lundebye, A.-K. 109
Velthorst, N.H., see Nuijens, M.J. 47

Westerholm, H., see Turunen, M. 85
Wiesner, D.A.
— and Sweeley, C.C.
Characterization of gangliosides by two-dimensional high-performance thin-layer chromatography 57

Xu, Z., see Boguslavsky, L. 15

Zomer, M., see Nuijens, M.J. 47
